

ANTS, ANTS, ANTS

Have you ever seen ants walking by the road, or in the grass? Ants are small, but they are very strong. They can carry something that weighs five times more than they do. They spend most of their time working to get food and taking care of their nest. When a job is too hard for one ant to do it will go and get another ant to help. Ants don't talk like people, but they do share messages with each other by touching their antennae together and also by leaving trails for other ants to smell so that they can follow. When they work together they can carry big things that are too heavy for one ant to carry alone.

Sometimes you may feel small, but you can do work too. You can help at home. You can help your Mom and Dad in their churches. You can maybe sing a special song, or color a coloring page to make someone happy. When there is a lot of work to do you can lend a hand to your parents just like the ants.

What does God Say?

Take a lesson from the
ants, you lazybones.
Learn from their ways
and be wise!
Proverbs 6:6

- What job can you do to help at home?
- How much can one ant carry?
- What do you think the ants in this picture have?
- How do ants signal other ants?
- Why do you think God wants us to work together?
- Have you ever seen an ant carrying anything?
