

How's your fruit? Part 6

The Parrot- Goodness

Cool Stats:

What are some things that you have heard about the parrot? Do you have one as a pet? Or know someone that does? Some parrots live to be 100 years old. Now that is old. There are over 328 species of parrots.

Fun Facts:

Parrots that live in the wild do not talk.

Some parrots living in the wild will fly up to 500 miles a day looking for food.

Parrots have a spouse for life.

Animal Connection:

Parrots are beautiful birds that live in tropical countries. All of them have a great ability to accurately mimic sounds they hear often. Parrots can make sounds that seem to be the ring of a telephone or the voice of a human. They can not decide if what they are doing is good or bad they will just mimic it.

Fruit of the Spirit Connection:

We can sound like we love and obey God, and we can sound like we are Christians but that does not make us a good person. True goodness comes from God. We have to do what the Word of God says to be truly filled with goodness. Anyone can sound sincere, but if we don't do the things we read in the Bible, then our words to God and about God are just imitations. God wants us to be Good and Love him for who he is. This week— practice goodness in your life!

“Do not merely listen
To the word, and so deceive
yourselves. Do
what it Says.”
James 1:22
